Professional Summary

Senior Business Analyst with 7+ years of experience translating business problems into implementation-ready requirements and driving product and digital transformation initiatives. Experienced in identifying and prioritizing AI use cases, assessing feasibility and business impact, and defining AI solution requirements for development teams. Strong in requirements engineering, stakeholder management, KPI frameworks, UAT, SQL, BI, and AI-assisted analysis and delivery.

Core Skills

Business Analysis & Requirements: Requirements Engineering, BRD/FRD Documentation, User Story Writing, Acceptance Criteria (Given/When/Then), Stakeholder Management, Business Metrics & KPI Frameworks, User Research, Persona Development, Process Modeling, UAT & Requirements Traceability, Business Case Development

Data & Analytics: SQL, Tableau, Power BI, Advanced Excel, Data Modeling, Dashboard Development, Business Intelligence

AI & Automation: Prompt Engineering, AI Agents, Claude (Claude.ai, Cowork), Gemini, Google AI Studio, NotebookLM, Microsoft 365 Copilot (Excel, PowerPoint, Power BI), n8n Workflow Automation

Delivery & Collaboration: Agile/Scrum, Jira, Confluence, Cross-Functional Leadership, Digital Transformation, Pilot-to-Production Delivery

Professional Experience

Senior Business Analyst | Accenture – *Bengaluru* **Nov 2021 - Present**

- Scaled a workforce enablement platform from 1 to 4 enterprise clients in 12 months by establishing business metrics frameworks tracking adoption rates, program completion, and cost-per-user – enabling leadership to evaluate program performance and drive expansion decisions
- Translated business problems into **implementation-ready requirements for AI solutions**, defining AI behaviors, inputs/outputs, business rules, edge cases, and acceptance criteria for development teams
- Analyzed existing products and business processes to **identify and prioritize high-value AI use cases**, assess feasibility and business impact, and translate selected use cases into detailed requirements
- Achieved a 75% pilot-to-product conversion rate by conducting field research across enterprise clients, synthesizing findings into 5 user personas and journey maps that directly shaped product roadmap priorities for 500+ users
- Partnered with product, design, engineering, and business stakeholders to translate needs into **BRDs/FRDs, user stories, acceptance criteria, and UAT scenarios**
- Built real-time Tableau and Power BI dashboards tracking engagement, completion, and conversion metrics for client and internal leadership stakeholders – improving delivery visibility and cross-team sprint alignment
- Pioneered AI-assisted business analysis workflows using **Claude and Microsoft Copilot** for market research, competitive analysis, and rapid prototyping – reducing discovery-to-validation cycles by 40%
- Identified opportunities to **automate manual business processes using AI**, evaluating use cases and translating selected opportunities into actionable requirements

Business Analyst | Solartis Technology – *Chennai* **May 2019 - Nov 2021**

- Delivered requirements engineering across 3 enterprise, compliance-driven technology projects, translating complex business rules into BRDs, FRDs, and system-ready specifications
- Partnered with enterprise clients and a 15-member cross-functional team to define functional requirements for core business systems; designed UAT strategies with full requirements traceability, maintaining 95%+ test coverage and zero production rollbacks across mission-critical platform go-lives

Education

Executive MBA - Symbiosis Institute of Business Management, Bengaluru (2023-2025)

B.E. Electrical & Electronics Engineering - Anna University (2015-2019)
